### Abstract

*Searching for the economic status like automobile sale & GDP (Gross domestic product) and estate price index will have an important meaning year by year whose indicator can exhibit the entire changing tendency and potential prediction further more. So they must be paid more attention for the sake of positively promoting our society burden & liability where the high talents like post-doctoral fellow can take charge of their responsibilities since the capability of them will be able to complete highly technology commercialization urgently. Because the conflict between regional countries and poverty happening in our surround we should take our charges into the actuality virtually to pay those minds in order to protect ourselves' right and benefit. On the other side the estate status can reflect the economy goodness and badness so we should have the strategy eye-light to analyse and judge correctly where the big policy will be judged in advance so as to earn our honor even commission from helping other ones with continuing efforts sustainably. Thereby the qualified senior researchers should grasp certain knowledge & experiences fluently and proficiently in order to proceed his sophisticated mathematical model to resolve his probably meeting problem rapidly where his capability and proficiency can wield into limitation. As to new emerging science field they may progress resolving causality genius' level & ability whilst the performance may prove to be correct and precise with a little deviation. So those high-technique may promote the economy innovation and development like AI (artificial intelligence) stocks diagnosis tool which may proceed decision with saving much time besides the analytic stocks function. Can we be judging it and using together? The answer has been negative obviously since it can not substitute human experts into that tool besides that it may be a machine not human who could not be responsible for our behavior due to being confident it. At last, the Asian ones are currently affording a strong potential in the world economy situation so we must consider about its development reason and forecasting future status in advance, which needs us to support and cooperate them largely and sustainably.*

**Keywords:** research; economic indicator; thriving; finance; retrieving; Stocks exchange; GDP; Fellows; Scholar; High-tech products; post-doctorate R & D Base; sustainably

### 1. Introduction

The economic GDP innovation is about to enhance national citizen life levels gradually throughout post-doctor research etc. efforts constantly. Therein the high technology level will eventually enhance continuously so as to achieve our strategic aim regulated by expert with forecast and regulation. Though there have been many difficulties fronting us but the resolving

method and wisdom can be sought certainly by our endeavour so that the innovative founding will be sought continuously and definitely. On the contrast the some eminent post-doctor researchers would develop their genius & capabilities for excellently processing our project transforming into commercialization continuously and with constant wisdom. On the other side, the automobile as an important

transportation's tool could affect its important role in remote control & regulation aspects. It now becomes a necessary family and group one throughout continuing to search now transformed into new energy vehicle to expect making goodness environment and atmosphere to the generations upon less exploiting resource on earth gradually and eventually. [1~5]

At last the estate as a indicator of economy situation will wield its strong role currently. Therein we should emphasize it and treat carefully by government's constitution correlational one. The policy will reflect the world economic situation and tendency to enhance its modernization level and make some to earn those money become rich in advance, thus the others can develop together. We should continue to put some relevant policy publicly upon changing situation sustainably which can encourage society fare, justice, balance in the end for those who make their endeavour and capability up. Especially the fellow of post-doctoral will play their cutting edge knowledge & experience and capability on relevant field like Deep seek president Master Wenfeng Liang graduated from Zhejiang University, information & electronic Engineering department acquiring his Master degree whose rapidness raises will initiate historical first case in light of the latest news recently.

## 2. Discussions

The China economy has been ongoing a rapidly developed period after experiencing several ten years effort, hereby the emerging industries like AI Robotic etc. will be encouraged in all aspects which may provide us many promise insights and developing space for our fellows and researchers to follow. Moreover, since the many needing talents may be recruited and used in cutting-edge-field in factories around us the education issue will propose by us whose task may be necessary and urgent for our future perspective, thereby the more carefulness and investment can be essential from now on.

### 2.1 Scientist introduction

Mizuta who graduated from Technological physics at Perking University in 1997 and University of Michigan for PhD(Degree of Philosophy). He had ever worked in Canada McGill University and U.S. University of Michigan. He currently takes charge in University of Michigan, Electricity Engineering and Computer Science, meantime he a union funder in NS Nano-tech company and NX Fuels one. His research field focused on low dimensional semi-conduction Photo-electronic clear energy and quantum photon etc. field. Due to a series of outstanding contribution in relevant field he acquired W.M. Cake Fund Prize and Engineering Award and IEEE(Institute of Electrical and Electronic Engineers) Nano-Tech committee Outstanding Lecturer Prize & Photon society outstanding Lecturer one. [2]

### 2.2 Goods exportation amount in past years

The goods exportation one would indicate the 231~106 billion dollars by the U.S., Germany Japan France Britain four economic communities in 1980 in light of Figure 1, meantime the former two ones could attain beyond 150 billion dollars in

the same year accordingly while the Japan France Britain retained below 150 billion dollars still. [5] At the same time, the Germany afforded 1.0% year-over-year while the U.S. provided 24% year-over-year in 1978~1980, which expressed the U.S.'s highest developing speed in the same years.

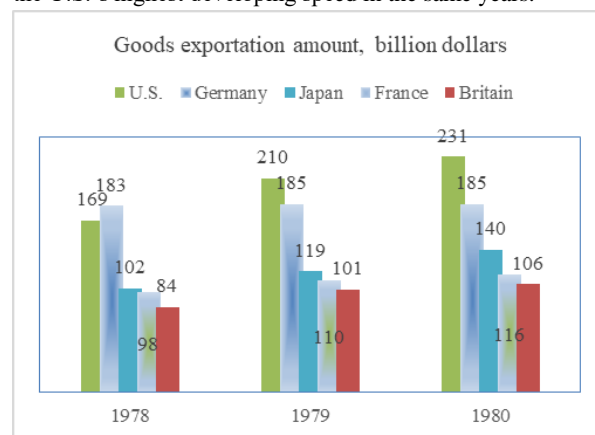

Figure 1 The goods exportation amount in 1978~1980.

### 2.2 The biggest vehicle group in China

The Biggest Auto group in China is formed by emerging Changan & Dongfeng Auto company whose sale would provide 2.684 & 2.48 million in 2024. Their raising speed might afford 5.1% & 23.7% accordingly in 2023~2024. At the same time, the Changan Auto's annual sale amount created new height in seven years and realized plus raising in continual five years while its new energy & its abroad sale created new height as well. The Changan Auto's new energy entire year sale afforded 0.735 million with annually raising speed attaining 52.8%, meantime the overseas entire sale arrived 0.536 with raising speed 49.6%. [9]

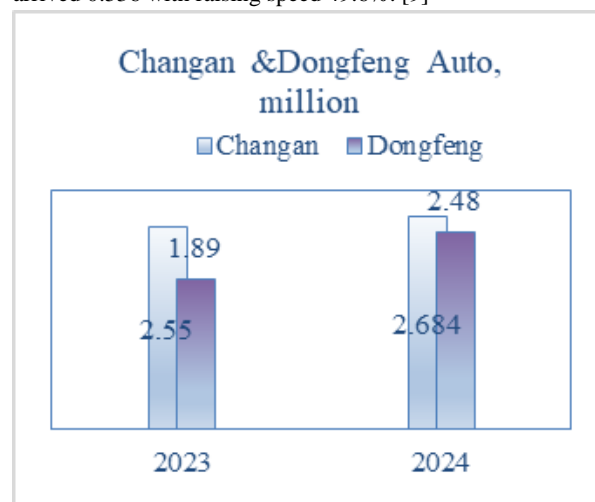

Figure 2 Changan & Dongfeng automobile sale amount in 2024~2023.

### 2.3 Five permanent countries foreign trade exportation rate with GDP

The five permanent country foreign trade export rate with their GDP would afford 44%~8.6% in 1976 in terms of Figure 3 where the rate speed could offer 10%~9% by Britain~China in 1975~1976 respectively. [10] The Soviet recorded 15% highest rate speed in those data while the China

attained the lower one with -9% at the same time. At those times i.e. 1966~1976, the political turmoil happened in China which affected its economy largely, so the China foreign trade exportation met a big resistance then. On the contrast, the Britain France U.S. occupied the top three position with 44%, 33%, 14% foreign trade exportation rate accordingly in those years.

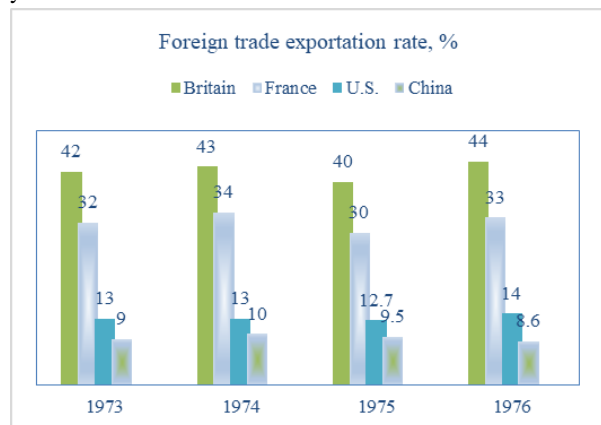

Figure 3 The five permanent country foreign trade export rate with their GDP in 1973~1976

#### 2.4 Enhanced new subjects in 2025

The enhanced new subjects in China has concluded in the five ones in Dalian University of Science & Technology as the Intelligent molecule engineering~Intelligent unmanned-system tech in terms of Table 1 in 2025. [11] On the other hand, there are four Engineering subjects and one Medicine one totally, so the Engineering occupies an important one, and then Medicine there.

Table 1. The enhanced new subjects in China

No.	Speciality	Code	Degree type	Years
1	Intelligent molecule Engineering	081309T	Engineering	Four
2	Clinical medicine	100201K	Medicine	Five
3	Future robotic	083201TK	Engineering	Four
4	Electronic information materials	080421T	Engineering	Four
5	Intelligent unmanned-system tech	082108T	Engineering	Four

#### 2.5 Guangdong & Zhejiang provincial five cities GDP ranking

The Guangdong & Zhejiang two provinces' cities GDP listing would exhibit 510~341 billion yuan in terms of Figure 4 in 2020 while the speed could provide 8%~7% by Jinhua~Zhongshan accordingly in 2019~2020. [10] Therein the Huizhou presented the highest speed with 10% with the

strong economic development in 2020 while the Zhuhai indicated the lower one in the same year. Moreover, the Jinhua developed with the stable amount & speed expressed the excellent economy status totally. On the contrast, the Jinhua~Zhongshan expressed 8.3%~3.6% speed in 2018~2019 respectively whose value presented that the Zhongshan had the lowest with 3.6% speed in the same years. On the comparison, the ones in 2020 had more speed with the average 8.0% than in 2019 with the average 5.8% on the whole.

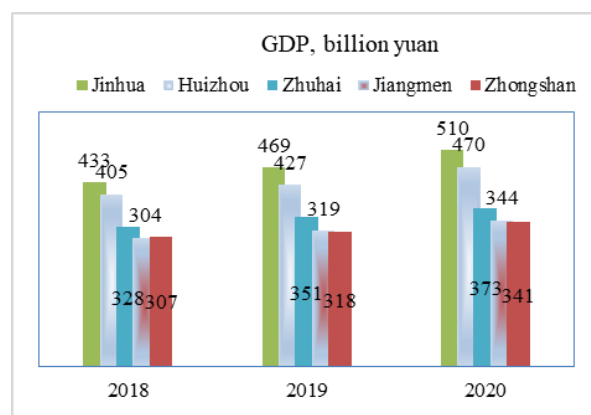

Figure 4 The Guangdong & Zhejiang Provincial five cities GDP comparison in 2018~2020.

The Guangdong & Zhejiang two provinces' three cities GDP listing would exhibit 1.1~0.37 trillion yuan in terms of Figure 5 in 2021 while the speed could provide 10%~5.7% by Dongguan~Maoming accordingly in 2020~2021. [10] Therein, the Dongguan presented the highest speed with 10% with the strong economic development in 2020~2021 while the Taizhou indicated the lower one with 3.5% speed in the same years.

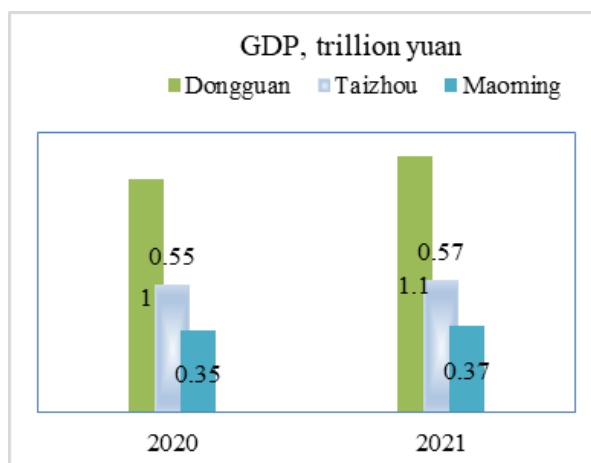

Figure 5 The Guangdong & Zhejiang Provincial three cities GDP comparison in 2020~2021.

#### 2.6 Stocks change in market recently

The shared ones on today [Dali Kaipu] for 6G; [Shenglu Communication] for 6G; [Sanfu Outdoors] for outdoors; [Haineng Da] for satellite communication; [Wo Love Wujia] with 000560 for estate. [1] To see the current cooperative customer's internal member-ship situation is concluded as

following Table 1 where [Hongqiang Lim], [Chifeng Gold] & [Haineng Da] have recorded the highest raising amount with near 20% both of them expressed the strong entities. Moreover, the [Guofang Group] raised limit again with accumulated raising amount beyond 60%. [3] On Friday the sharing stock [Guofang Group] raised limit with three days three plates; [Baoshui Tech] finished two days two plates; [Leshan Electric], [HUamao Logi.], [Hongbao Li] etc raised big, raised limit, continual plates. [7] On the other hand, the quantum investment research & choice will include in four key-rights adding two feature-function to help you speculation in stocks market more conveniently. Therein the four key rights have had 1. precisely choosing stock pool. Assist you to resist in the excellent combination good ones for the sake of absorbing lowly good chance; 2. Intelligent-tool. Subsidiarily assist your dealing decision for the sake of dealing stock simply; 3. excellent classes. Help you to structure specific investing systems so as to promote yourself skills; 4. Counselling in research. Help you to collect refresh information so as to transfer the cutting-edge-field journal in time. Meanwhile, the two feature-function will have 1. sweeping thundering and diagnosing; 2. focusing radar. [6]

**Table 1. Current cooperative customer's internal member-ship stocks**

Time	Name	Status	Raising amount, accumulated
April 9	Chifeng Gold	Strongly raising limit	19.9%
April 10	Western Gold	Strongly raising limit	17.1%
April 14	Haineng Da	Strongly raising limit	18.3%
April 14	Liou Lim	Strongly raising limit	-
April 16	Hongqiang Lim	Strongly raising limit	20%
April 18	Chuanyi Tech	T+1	9.5%
April 21	Jinqiao Info	Strongly raising limit	-

### 2.7 Introduction of Fringe Global Scientific Press

The author can publish with Fringe Global Scientific Press. The rigorous peer review wants to ensure high standards of quality and scientific integrity; The open access includes maximizing the visibility and impact of your research globally; The rapid publication will be providing timely feedback and a swift publication process; The indexed Journal includes enhancing discoverability of your work through prestigious databases; IPI(International Periodical Impact Factor) Indexing is IP indexing value-2.9. The submission guidelines include manuscript preparation will follow the guidelines available on our website author Submission

Guidelines; The originality includes Submissions should be original and not under consideration elsewhere; Submission Portal is about to Submit your manuscripts by email: [editorjsihs@fringeglobal.com](mailto:editorjsihs@fringeglobal.com) via Online Submission (<https://fringeglobal.com/ojs/index.php/jsihs/about/submission>); The website is as following. <https://fringeglobal.com/ojs/index.php/jsihs/index>; APC (Article Processing Charge) is including Fringe Global Scientific Press provides the publication free of cost. There is no need to pay the APC for the journals. At last, your contribution will significantly enhance the quality and scope of our journal. Should you have any questions or require further assistance, please feel free to contact us. [8]

### 2.8 Amanda-the largest daily necessities supplier

Writing this letter is about to discuss with Store comprehensive product solutions. Amanda is one of the largest daily necessities supply chain companies in China. We have supplied to over 200 global chain supermarkets. We are looking to become your partner and provide you with goods and OA payment solutions. Our high-quality goods will satisfy all of customers in the world. The benefits of our cooperation has included in. 1. The Store's one-stop success model output, directly copy the store, quickly profitable; 2. Develop local agent authorization and supply, and continue to gain substantial benefits; 3. No need to worry about fake and patent infringing products, reliable product quality and cost savings (we are a large company that sells hundreds of millions of dollars a year in China, we provide not only goods, but also credit guarantees, we have 5,000 quality factories, 30,000 kinds of products); 4. Sell only necessities, respond quickly to new products on the market, and low price (20%-90% lower than e-commerce ); 5. Category: Household Supplies, Beauty & Skin Care, Office Stationery, Seasonal products, Digital Accessories, Trendy Jewelry Accessories, Popular bag, Plush Toy, Craft & Gift, Auto Accessories [4] We, Amanda International Group (Since Jan. 2008), will sell those daily necessities as an outstanding supplier, thank you.

### 3. Conclusions

In one country the high-tech skills will become an important role on determining the nation's economic development primarily, so that the high support like policies and following capitals by government or institution may play a very significant meaning in sustainable research and development in university manufacturer or institution. We should not hesitate to wait for the time and make a immediately decision to erect corresponding policy and invest money to encourage the new-venture-enterprise with proceeding high-tech products. On the other side, the economic GDP innovation is about to enhance national citizen life levels gradually throughout post-doctor research etc. efforts constantly. Therein the high technology level will eventually enhance continuously so as to achieve our strategic aim regulated by expert with forecast and regulation. Though there have been many difficulties fronting us but the resolving method and wisdom can be sought certainly by our endeavour so that the innovative founding will be sought continuously and definitely. On the contrast the some eminent post-doctor

researchers would develop their genius & capabilities for excellently processing our project transforming into commercialization continuously and with constant wisdom. On the other side, the automobile as an important transportation's tool could affect its important role in remote control & regulation aspects. It now becomes a necessary family and group one throughout continuing to search now transformed into new energy vehicle to expect making goodness environment and atmosphere to the generations upon less exploiting resource on earth sustainably and importantly.

### Conflict of interest

The authors state that there are no conflicts of interest to disclose.
