Abstract

The economic development could relate with the enterprise behaviour besides GDP one closely and cooperatively. Therefore we need to advocate and deepen its research for the sake of promoting the judgment capacity when the relevant data is shown in front of us, which may provide a innovative method or apply its data to the regressive one even actual forecast in the future. The Australia and China provinces may be described as GDP alignment with graphs to expressing their difference and advantage besides defect to make sure that the GDP value stabilized the development in the end. At the same time, maintaining a certain scientist team can become an eminent and urgent work for us to go on searching for fittest talents to process their project with smoothness. We should care for both of them so as to develop a good achievement in our economic development behavior and judgement by our excellent experts and scholars at all. In short, the new digital time in 21st century will develop more rapidly than electrical revolution in last century because the super-computer and AI chip will be applied largely in manufacturers which is mainly electronic adding software reformative combination and collaboration at last. Moreover, the as many as grasped natural knowledge scientist needs to be cultivated and collected at domestic and abroad with big endeavour sustainably and frequently. We would constantly process our judgement to complement the demands came from current spurring. At the same time, collecting excellent scholar and scientists for retrieving economy development and high-tech product has been urgent and significant by now. We should recruit all of the human resource to progress the AI, Robotic, high railway, new pharmacy with a series of innovative reformation for our generations sustainably and continually.

Keywords: economic innovative; high-tech; revive; study; product; economy initiation; sustainably; behavior; judgement; scientist; scholar

1. Introduction

The high-tech skill through experiment and theoretic calculation could exhibit the controlled factors to a certain phenomena like quantum physical photon behavior, so that we could know some parameters how to control and monitor its tangle and lap-over one for us to know its deepening phenomenon around it. So if we see the academic paper in journal there are many relevant articles to express the quantum physical and dynamics content for us to join the mysterious world. On the other side, the economic development indicator GDP as an important factor is about to impact our quality of life, so we need to know more about its behavior and judge the internal meaning to chase the No. one position as an economic community to wield the leader-ship

capability in the world. Therefore, the common two mentioned aspects would influence the future human-being quality of life, so that the collaborative relationship might cause a series of achievement in high-tech and economy aspect for our general human to proceed the cutting-edge-field and multi-economy activity absolutely. [1~11]The two aspects could influence with each other mutually, the former may improve the latter's development, on the contrary the latter will promote the former's procedure definitely. Only we adopt the cooperative methods with balance can the large efficiency and the low cost may occur in the end. Let us continue to wield our diligence and endeavour towards the future processing sustainably. Let all the beautiful result and life to bloom and produce many fruitful achievements continuously.

[12] On the other side, the economic behaviour would affect current and future style since the important tendency in historical and recent one. So we need to maintain the aware judgment and decide the any important one on practical and theoretic wisdom so as to progress the economic development orbit according to the database shown in official website or the economic newspaper in time.

2. Discussions

We believe that the correct decision could make profit in our economic activities like enterprise management specially in financial report and GDP indicator tendency for the sake of programming the economic even financial innovation. Therefore, the narrative discussions may be processed as below in details from the enterprise profit and management to region GDP alignment correspondingly. On the other side, the scholar's paper would express the new innovative idea and methods most lately in relevant journal so we need to concentrate on its latest development status by the university, which may indicate a certain development exploration for us to consider more carefully and prudently.

2.1 International Journal of Engineering Research and Applications

Its connected address is ijera.ad@gmail.com. As for the Researcher, the International Journal of Engineering Research and Applications(IJERA) is ISO 3297:2007 certified open access and peer reviewed refereed international Journal. It is an Indian journal with rapidly publishing time and quality. This time, it invites articles that illustrate research results, projects, surveying works and industrial experiences that describe significant advances in the areas of Engineering, Technology, Science and Mathematics. We welcome all the authors from the world submitting their precious papers to our journal for their evaluating professional title and further development, which is the main destination published in this journal. The indexing includes in NASA Ads, ArXiv, ANED (American National Engineering Database), EBSCOHost, Cabell's Directory, DOAJ, NCBI (US National Library) etc., and our Impact factor of IJERA is to be 6.185 with certifying our website <http://www.ijera.com/impact-factor.html>; IC Value (By Index Copernicus): 5.29. The below is the detailing information. Article Notification spends within 1 days after Submission; Publication (Online) spend within 2 days. [6] You can submit your manuscript by simply mailing on <https://www.ijera.com/pages/submit.php> in MS Word format. At last we heartily hope the authors to submit their articles to this journal with cheap publishing fee and quickness.

2.2 International Journal of Engineering & Science

Its website in Internet is the www.theijes.com. The International Journal of Engineering & Science (The IJES) is a high-quality open access peer reviewed research journal. IJES provides a platform for the researchers, academicians, professional, practitioners and students to impart and share knowledge in the form of high quality empirical and theoretical research papers, case studies, literature reviews and book reviews. IJES welcomes and

acknowledges high quality theoretical and empirical original research papers, case studies, review papers, literature reviews, book reviews, conceptual framework, analytical and simulation models, technical notes from researchers, academicians, professional, practitioners and students from all over the world. They welcome authors from all of world to join and submit their precious articles to the journal, and they are eagerly anticipating all kinds of papers submitted them rapidly.

The Journal Publishes in an online version. IJES publishes research papers in the field of: Science and Engineering: All kinds of Science and Engineering, Technology and In Education, Environmental Studies, Climate Change, Agricultural, Rural Development, Urban Studies etc. Social science and Humanities: Social Science and Humanities, Sociology, Social Welfare, Anthropology, Religious Studies, Visual Arts, Political, Cultural Aspects of Development, Tourism Management, Public Administration, Psychology, Philosophy, Political Science, History, Education, Women Studies and so on. Business and Economics: Business and Marketing, Economics, Financial Development, Accounting, Banking, Management, Human Resources etc. Thereby, they require the below aspects in detail. [7] 1. The IJES is inviting papers for Vol. 13, No. 10 which is scheduled to be published in May -2025. Acceptance Notification: 2. Within 2-3 days from the date of manuscript submission; 3. Send your manuscript to the editor as theijes@submititmails.com. At the same time, our series number is the ISSN 2319-1813, and Our Journal Impact Factor 2023 is to be 7.2, submissions open for May, 2025, and submit to that address as <https://www.theijes.com/submit.php>. Then we promise to guarantee all kinds of papers submitted there to pass reviewing and publishing as a rapidly qualified one in the end.

2.3 IOSR Journals

Its Indexing may include in Index Copernicus, Cross Ref (USA), NASA ads, Citation Index, Google Scholar, Open- J Gate. Moreover, the IOSR Journals provides DOI (Digital Object Identifier) to each article. IOSR Journals DOI is 10.9790. The IOSR Journals got 9th Ranking by AQCI (African Quality Center for Journals) - Top 20 Journals Ranking. The Papers are invited for IOSR Journals May 2025 Issue related to all fields of Engineering, Management, Physics, Chemistry, Mathematics, and Medical & Dental Science, Pharmacy, Applied Sciences, Nursing, Humanities, Agriculture and Environment science and Social Science etc. They conclude all related field in management and engineering aspects, so the IOSR Journals have following different open access Journals as following in details. [8]

Table 1 The IOSR Journal lists and impact factor.

Journals	Impact factors	Journals	Impact factors
Engineering	6.6	Pharmacy	5.4
Computer Engineering	3.7	Electrical and Electronics	3.2

Engineering			
Pharmacy and Biological Science	3.8	Nursing and Health Science	4.5
Mechanical and Civil Engineering	8.0	Electronics and Communication Engineering	3.1
Dental and Medical Sciences	5.1	Dental and Medical Sciences	3.2
Agriculture and Veterinary Science	2.8	VLSI(very large-scale integration) and Signal Processing	3.1
Mobile Computing & Application	3.1	Sports and Physical Education	2.9
Polymer and Textile Engineering	2.8	Humanities and Social Science	4.6
Research & Method in Education	3.2	Applied Geology and Geophysics	2.9
Environmental Science, Toxicology and Food Technology	3.4	Mathematics	3.9

2.4 Australia and China province GDP comparison in 2000 and 2014

The China province and Australia GDP value could display 480 BY(billion yuan)~340 BY by Hebei and Anhui in 2000 like in Figure 1 accordingly where the most rate is about to provide 1.5 times with middle one then. Furthermore the Liaoning retained the approaching value which occupied the second position with Hebei which was the first one generally.

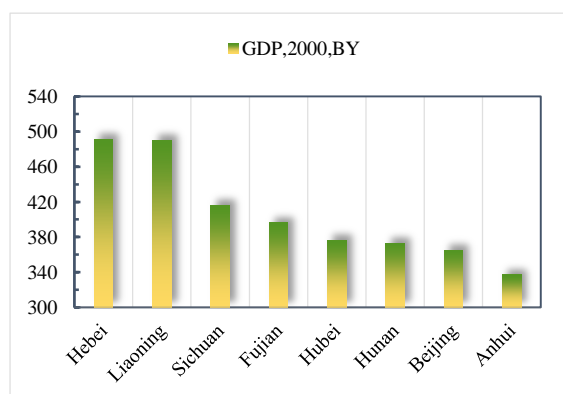

Figure 1 The China ones & Australia GDP list I in 2000. [3]

At the same time, the China province and Australia GDP value could display 2.6 TY(trillion yuan)~2 TY by Hunan and Liaoning in 2014 like in Figure 2 accordingly where the their rate is about to provide the same one then. Moreover, the Shanghai Hebei Fujian retained the approaching value which occupied the second~fourth position with Hunan which was the first one generally.

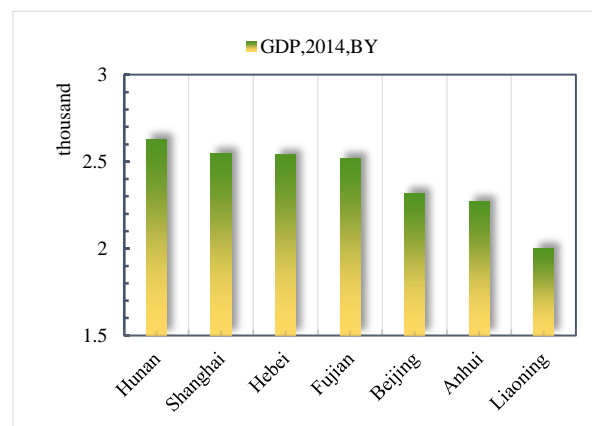

Figure 2 The China ones & Australia GDP list I in 2014. [3]

2.5 Motor business sale amount net profit

The motor business sale amount and net profit could display 70BY and 3.7BY in 2024 accordingly like in Figure 3. Furthermore, their value occupied 17BY and 1BY in 2025 Q1 while the they were 15BY and 1BY in 2024 Q1 correspondingly where the sale amount had somewhat be lowered in 2024. So the forecast value in 2025 they would become 68BY and 4BY respectively where the sale amount could indicate the high value somewhat then. At the same time, the y-y value may provide 5.6% and 3% by both of them accordingly with higher sale amount than net profit in 2024.

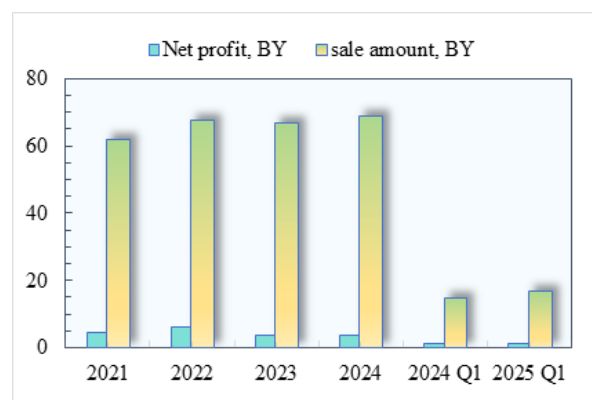

Figure 3 The motor business top three companies' net profit & sale amount in 2021~2025. [4~5]

2.6 Lithium battery one

The Lithium battery business sale amount and net profit could display 230,000 yuan ~140,000 yuan and 15 BY(billion yuan)~1BY by Ningde Times~Guoxuan Gaoke in 2021~2025 and 2025 Q1 accordingly like in Figure 4. So that the Shilan Wei occupied the No. One position while the latter possessed the No. Three one. To compare with the discrete unit its sale

amount will better somewhat but the salary per capita may decline largely referred to the literature. [1]

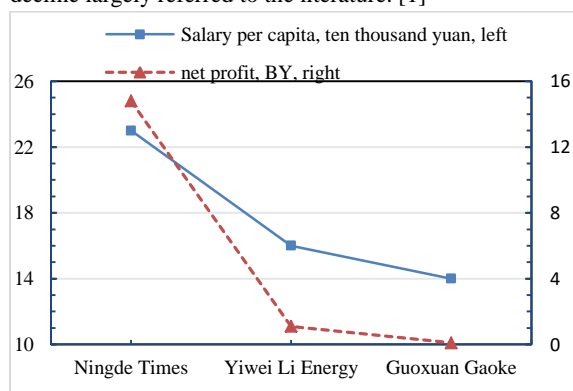

Figure 4. The Lithium battery business top three companies' sale amount and net profit in 2021~2025, net profit is Q1 2025 data, salary per capita is 2024 data. [1~2]

Furthermore, the Lithium battery business net profit y-y ROE(return on equity), salary y-y &staff y-y could display 30%~170%, 20%~10%, 5%~6.2% &13%~11% by Ningde Times~Guoxuan Gaoke in 2021~2025 accordingly like in Figure 5. So that Guoxuan Gaoke and Ningde Time occupied the No. one & two position correspondingly while the Tiwei Li Energy had the end position. [1]

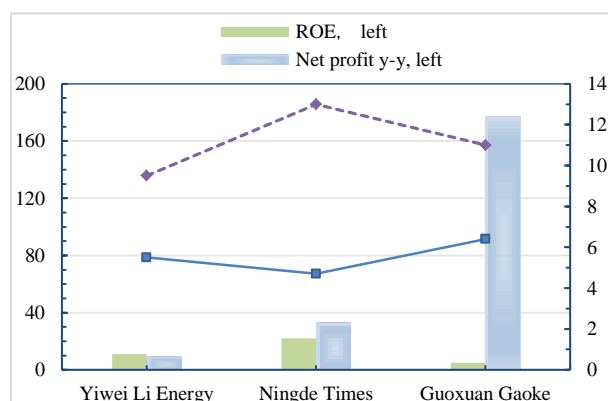

Figure 5. The Lithium battery business top three companies' ROE and net profit y-y &staff y-y in 2021~2025, %(Units). [2]

On the other hand, the Discrete Unit business ROE, net profit y-y salary y-y &staff y-y could display 2%~18%, 0%~16%, 3.5%~2% &10%~17% by Shilan Wei~Jiejie Micro-elec in 2021~2025 accordingly like in Figure 6. So that Yangjie Tech and Jiejie Micro-elec occupied the No. one & two position correspondingly while the Shilan Wei had the end position. [1] Therefore, the Discrete unit could have a less profit than the Lithium battery.

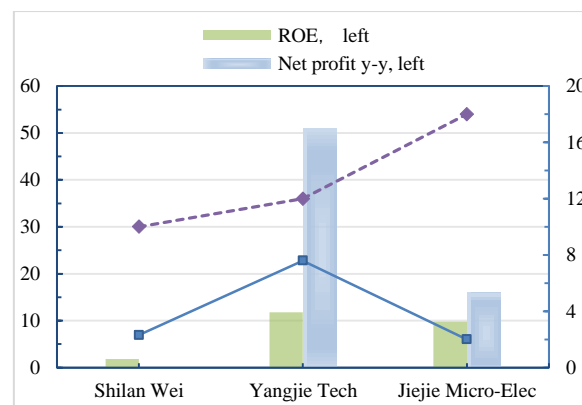

Figure 6. The Discrete unit business top three companies' ROE and net profit y-y &staff y-y in 2021~2025, %(Units). [2]

3. Conclusions

The high-tech skill through experiment and theoretic calculation could exhibit the controlled factors to a certain phenomena like quantum physical photon behavior, so that we could know some parameters how to control and monitor its tangle and lap-over one for us to know its deepening phenomenon around it. So if we see the academic paper in journal there are many relevant articles to express the quantum physical and dynamics content for us to join the mysterious world. On the other side, the scholar's paper would express the new innovative idea and methods most lately in relevant journal so we need to concentrate on its latest development status by the university, which may indicate a certain development exploration for us to consider more carefully and prudently. Hereby, the as many as grasped natural knowledge scientist needs to be cultivated and collected at domestic and abroad with big endeavour sustainably and frequently. We would constantly process our judgement to complement the demands came from current spurring. Overall, we need to insist in both high-technique skills and economy knowledge and experience for us to contribute on the capital investment like A stocks real house etc. items because they are about to influence with each other. There are many men who succeeds in qualified investment with AI(artificial intelligence) diagnosis tool which is a relevantly accurate diagnosis to several thousand stocks in exchange-market for indicating us the one which is to be chosen and when you deal even how much you pay etc..

Conflict of Interest

The authors declared there were not conflicts of interest to disclose.
