### Abstract

The economy includes finance innovation like GDP(gross domestic product) indicator will be an important factor for us to grasp since the value may reflect the economic development tendency in a region and country. We should continuously analyze the each year, month status so as to find the economy development normal step and monitor its track. When there are new signal happened in the value we could review and make a good decision to assist its helpful development speed with a certain measure. We may find some problem for us to know its wrong or good path so that in time regulate its administration for the sake of improving current situation constantly with experts negotiating to solve the difficult point like policy instruction in light of investigating the Q & A. on the other hand, the high-tech product may be another important factor for us to search and develop which may promote the economy development definitely. We need to hear from scientists to proceed mature product to push forwards market for its outstanding performance continually. Because the cutting-edge-field will become a promise in economy development like employment problem our endeavour will change the high unemployment rate through erecting manufacturer and research & development department in university where many innovation items can be solved upon searching for the combination with common collaboration between sample and launch goods. After satisfying the cost requirement the product can be permitted to produce commercial products to flow into market to find its feasibility and new market demand like current AI(artificial intelligence) product.

**Keywords:** study; revive; economy & finance innovation; GDP indicator; cutting-edge-field; speciality; fellows; sustainably

### 1. Introduction

The high-tech skill through experiment and theoretic calculation could exhibit the controlled factors to a certain phenomena like quantum physical photon behavior, so that we could know some parameters how to control and monitor its tangle and lap-over one for us to know its deepening phenomenon around it. So if we see the academic paper in journal there are many relevant articles to express the quantum physical and dynamics content for us to join the mysterious world. On the other side, the economic development indicator GDP(Gross domestic product) as an important factor is about to impact our quality of life, so we need to know more about its behavior and judge the internal meaning to chase the No. one position as an economic community to wield the leadership capability in the world. Therefore, the common two mentioned aspects would influence the future human-being quality of life, so that the

collaborative relationship might cause a series of achievement in high-tech and economy aspect for our general human to proceed the cutting-edge-field and multi-economy activity absolutely. [1~8]The two aspects could influence with each other mutually, the former may improve the latter's development, on the contrary the latter will promote the former's procedure definitely. Only we adopt the cooperative methods with balance can the large efficiency and the low cost may occur in the end. Let us continue to wield our diligence and endeavour towards the future processing sustainably. Let all the beautiful result and life to bloom and produce many fruitful achievements continuously. On the other side, the economic behaviour would affect current and future style since the important tendency in historical and recent one. So we need to maintain the aware judgment and decide the any important one on practical and theoretic wisdom so as to progress the economic development orbit according to the database shown in official website or the

economic newspaper in time. [9~15] Therefore, the innovating enterprise will include the GDP indicator and product like Automobile incoming etc. high-tech product analysis with publishing scientist, engineers and fellows's high-quality papers in high-level journal to influence advance mind and measure, which may cause the vibrated impact and awareness. So the high-tech skill and product could be innovated by us through continually searching for defining technology and experience so as to progress our productive development and life quality.

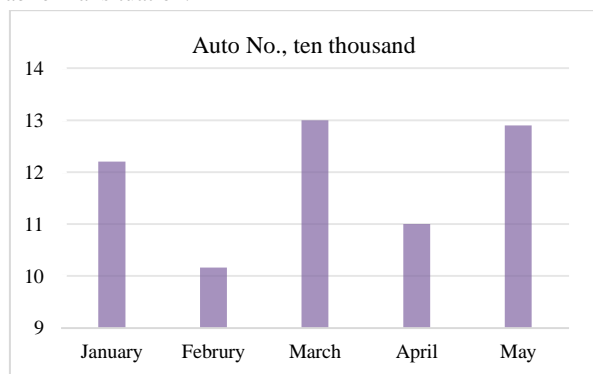

## 2. Discussions

We believe that the correct decision could make profit in our economic activities like enterprise management specially in financial report and GDP indicator tendency for the sake of programming the economic even financial innovation. Therefore, the narrative discussions may be processed as below in details from the enterprise profit and management to region GDP alignment correspondingly. On the other side, the scholar's paper would express the new innovative idea and methods most lately in relevant journal so we need to concentrate on its latest development status by the university, which may indicate a certain development exploration for us to consider more carefully and prudently.

We need to continue to process new innovation product for the sake of satisfying people requirement in modern society. So the many research and development would help us to bring out new product into our life continually. We may advocate the innovation maker to erect their factories in urban integrative zone supported by the government capital sustainably for transforming our society into green and low contamination one, which is more urgent now.

### 2.1 BYD Auto maker's PHEV sale amount I

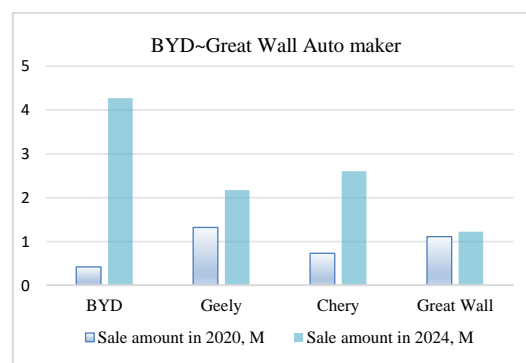

The BYD auto maker's PHEV sale amount would display 12.2~12.9 ten thousand by January~May 2025 in light of Figure 1 accordingly whose speed could exhibit -16%, 27%, -15% &17% correspondingly in February~May. There, February &April retained the minus speed explaining the abnormal situation.

**Figure 1 The BYD Auto maker's PHEV sale amount in January~May 2025. [1]**

Moreover, the Auto maker's sale amount would display 4~12 million by BYD~Great Wall in 2024 according to Figure 2 respectively whose speed could exhibit 916%, 64%, 256% &

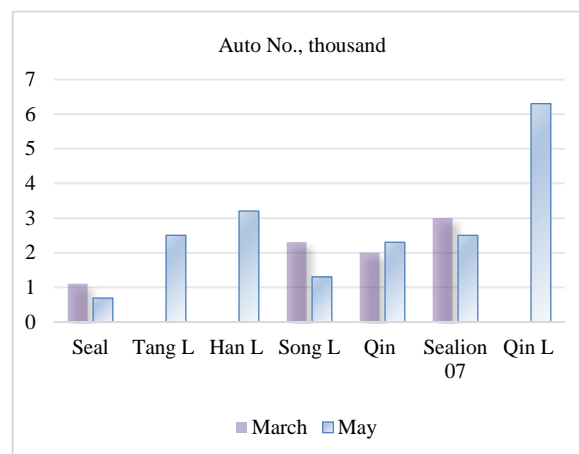

10% correspondingly in 2020~2024. There, the Great Wall & Geely retained the lowest & lower speed explaining the abnormal situation while the BYD &Chery maintained the highest speed in turn as well.

**Figure 2 The BYD~Great Wall Auto maker's sale amount III in 2025.**

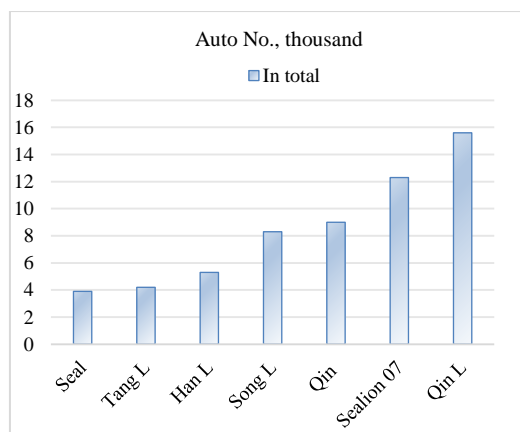

### 2.2 BYD EV sale amount

The BYD EV sale status could exhibit 800~6,300 by Seal~Qin L in May, 2025 in light of Figure 3 accordingly whose one might indicate 1,100~3,000 in March, 2025 respectively. The time between them in May attained 7.8 times on the other hand.

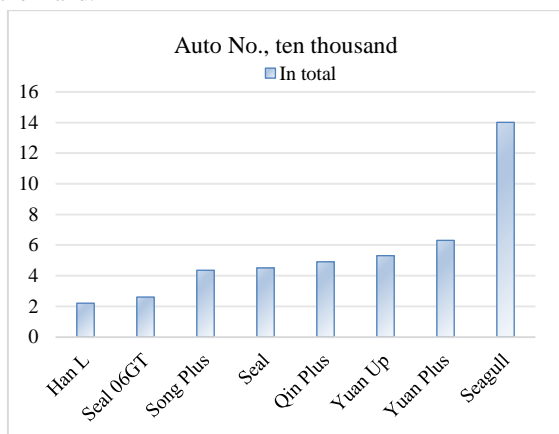

**Figure 3 The BYD Auto maker's EV sale amount in March &May 2025. [3]**

Moreover, the BYD EV sale status could exhibit 4,000~15,800 by Seal~Qin L in total in light of Figure 4 accordingly whose times might indicate 3.95 in the former five months 2025 explained the latter's strong entity. The time between them in May attained 7.8 times on the other hand.

**Figure 4 The BYD Auto maker's EV sale amount in Jan~May 2025. [3]**

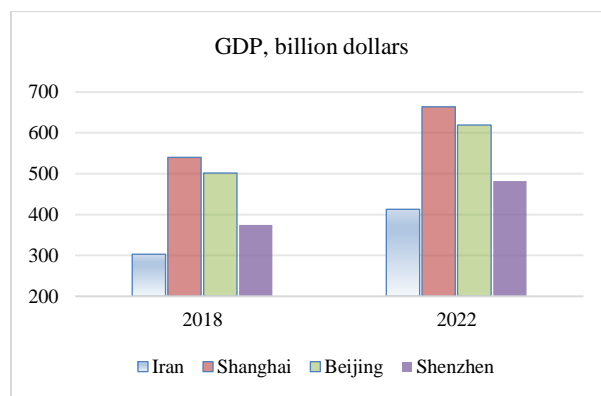

At the same time, the BYD EV sale status could exhibit 21,000~140,000 by Han L~Seagull in total in light of Figure 5 accordingly whose times might indicate 6.67 with big variation in the former five months 2025 explained the latter's strong capacity & entity. The time between Seagull and Yuan Plus in total attained 2.22 times with not small value on the other hand.

**Figure 5 The BYD Auto maker's EV sale amount in January~May 2025. [3]**

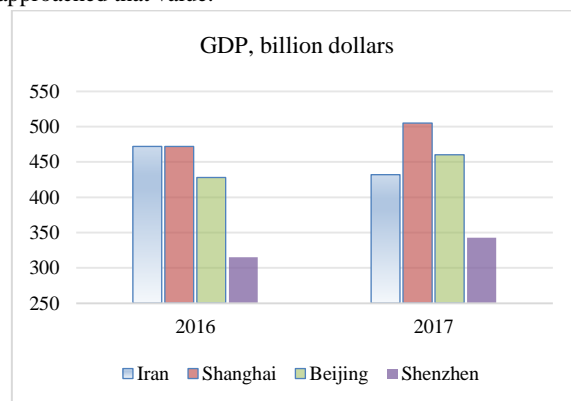

### 2.3 China provinces & Iran GDP rank

The China provinces and Iran GDP could exhibit 660~410 billion dollars by Shanghai and Iran while the Beijing and Shenzhen arrived 610~480 billion dollars in 2022 accordingly in light of Figure 6. In 2022 the regions which exceeded 500 billion dollars could indicate Shanghai and Beijing municipality besides that the Shenzhen approached that value

**Figure 6 The China provinces & Iran GDP in 2018~2022.**

At the same time, the China provinces and Iran GDP could exhibit 420~500 billion dollars by Shanghai and Iran while the Beijing and Shenzhen arrived 460~340 billion dollars in 2017 accordingly in light of Figure 7. In 2017 the regions which exceeded 500 billion dollars could indicate Shanghai municipality uniquely besides that the Beijing and Iran approached that value.

**Figure 7 The China provinces & Iran GDP in 2016~2017. [5]**

### 2.3 Scientist Zhengguo Xiao

"Weakly space-confined all-inorganic perovskites for light-emitting diodes" was published in Nature which paper is the first completed unit by China University of Technology and unique communication author is Zhengguo Xiao who graduated from Shandong University of Technology in 2008 and in 2011 he graduated from solid physical Institute at China Academy of Science acquired his Master degree and finally his PhD graduated from U.S. University of Nebraska, Lincoln. Then he went to University of Princeton to process his post-doctoral research. He returned back and joined China University of Academy in 2018, currently he is a professor in Physic department. [4] The Zhengguo Xiao mainly processes new functional semi-conductivity material photo-electronic device research included in hybrid perovskite solar battery, perovskite LED, photo-electronic detector, thin film transistor, memristor etc..

### 2.4 International Journal of Engineering & Science

The International Journal of Engineering & Science (The IJES) is a high-quality open access peer reviewed

research journal with web site to be [www.theijes.com](http://www.theijes.com). IJES provides a platform for the researchers, academicians, professional, practitioners and students to impart and share knowledge in the form of high quality empirical and theoretical research papers, case studies, literature reviews and book reviews. Moreover, the IJES welcomes and acknowledges high quality theoretical and empirical original research papers, case studies, review papers, literature reviews, book reviews, conceptual framework, analytical and simulation models, technical notes from researchers, academicians, professional, practitioners and students from all over the world. [2]

The Journal Publishes in an online version. IJES publishes research papers in the field of: Science and Engineering: All kinds of Science and Engineering, Technology and In Education, Environmental Studies, Climate Change, Agricultural, Rural Development, Urban Studies etc. Social science and Humanities: Social Science and Humanities, Sociology, Social Welfare, Anthropology, Religious Studies, Visual Arts, Political, Cultural Aspects of Development, Tourism Management, Public Administration, Psychology, Philosophy, Political Science, History, Education, Women Studies and so on. Business and Economics: Business and Marketing, Economics, Financial Development, Accounting, Banking, Management, Human Resources etc. So that the IJES is inviting papers for Vol. 13, No. 10 which is scheduled to be published in June - 2025. So the acceptance Notification will be within 2-3 days from the date of manuscript submission; Please send your manuscript to the editor at: [theijes@submitmails.com](mailto:theijes@submitmails.com); 3. Our code number will be ISSN: 2319-1813, Our Journal Impact Factor can be 7.2 in 2023, the submissions open for June, 2025; The submit to the following address, [https:// www.theijes.com/submit.php](https://www.theijes.com/submit.php).

### 3. Conclusions

Because the economy could depend on the high-technique research and development whose role may be important like AI (artificial intelligence) product on Yushu Technology corp. In China and Boston dynamic corp.. The former's humanoid robot will have swift and rapid feature while the latter may have men-like and accurate one. They are about to become future AI robotic start-profile to encourage us to progress further steps to consider the cost budget and materials, working stability etc. manufacture problem. So the economy influences the high-technique field skill and product research & development largely through joining to the research's many respects like human resource, materials and capital expending etc.. however, those support may be completed the manufacturer plan and determined by government institution, so they must guarantee the requested profit which can be burden mostly by manufacturer or the bilateral burden like advantage items for example the new energy project, ocean project, aerospace engineering, drug making, food product. So the primary, secondary industry and service sector (Tertiary industry) will be developed broadly to satisfy the human being demand more and more. Therefore, we may enjoy the cutting-edge-field product and service early and aim for exploring aerospace even astronautic story in the end.

Meanwhile, through learning their knowledge published in journal we could proceed the relevant project research and development to apply to make samples to certify the error deviation for those data and their correct so as to extend our research scope and further direction as to a certain products.

### Foundation

This paper was supported by the Korean Science & Engineering Fund under the Granted No. 96-0300-11-01-03 with Specified Basis Research Program.

### Conflict of Interest

The authors declared that there were not conflicts of interest to dispose.
