Abstract

The economy includes finance innovation like GDP(gross domestic product) indicator will be an important factor for us to grasp since the value may reflect the economic development tendency in a region and country. We should continuously analyze the each year, month status so as to find the economy development normal step and monitor its track. When there are new signal happened in the value we could review and make a good decision to assist its helpful development speed with a certain measure. We may find some problem for us to know its wrong or good path so that in time regulate its administration for the sake of improving current situation constantly with experts negotiating to solve the difficult point like policy instruction in light of investigating the Q &A. on the other hand, the high-tech product may be another important factor for us to search and develop which may promote the economy development definitely. We need to hear from scientists to proceed mature product to push forwards market for its outstanding performance continually. Because the cutting-edge-field will become a promise in economy development like employment problem our endeavour will change the high unemployment rate through erecting manufacturer and research &development department in university where many innovation items can be solved upon searching for the combination with common collaboration between sample and launch goods. After satisfying the cost requirement the product can be permitted to produce commercial products to flow into market to find its feasibility and new market demand like current AI(artificial intelligence) product.

Keywords: study; thrive; economy &finance innovation; GDP indicator; AI speciality; fellows; sustainably

1. Introduction

The economy GDP(Gross domestic product) will reflect one country and region economic development degree with value so it is an important factor affecting our live quality closely. Moreover its value can be compared with different one to find the difference among them so we may clarify the actual economy position and level for us to consider and take a tactic. So how to enhance the GDP gradually with blue-diagram will become a government's necessary task in front of us, which may be determined by us whether or not to adopt a rapid method to promote it. We should promote it according to itself actual situation like labour force and capital &necessity analysis so the speed can be controlled by national institution and monitor one. Because we are existing in a reformation period like internet formation and electronic monitor time we can not cover us in a close space so the common developing requirement may be advocated by our

citizen and government. [1~7] Thereby we need to adopt a necessary method to improve our life level to more advancement which may be a tendency for us to make a plan diagram to develop the economic GDP urgently. However some parameters may be proposed by institution of government which may become the next season or year indicator let us chase and achieve because current situation is in a higher developed one like 150,000 dollars per capita in China. We should constantly open seminar to explore the current economic speed so as to maintain a toughness development but only a rapid within one time. We still need to develop economic GDP with long time in ten years even twenty years later. [8~18] At the same time the high-tech product may promote the economic GDP development since it has the promise perspective in future, so the more advanced high-tech level will create higher GDP enhancement meantime. On the other hand, the new industrious chain may

be formed through innovating product which may progress the actual economy forwards and sustainably.

2. Discussions

We believe that the correct decision could make profit in our economic activities like enterprise management specially in financial report and GDP indicator tendency for the sake of programming the economic even financial innovation. Therefore, the narrative discussions may be processed as below in details from the enterprise profit and management to region GDP alignment correspondingly. On the other side, the scholar's paper would express the new innovative idea and methods most lately in relevant journal so we need to concentrate on its latest development status by the university, which may indicate a certain development exploration for us to consider more carefully and prudently.

We need to continue to process new innovation product for the sake of satisfying people requirement in modern society. So the many research and development would help us to bring out new product into our life continually. We may advocate the innovation maker to erect their factories in urban integrative zone supported by the government capital sustainably for transforming our society into green and low contamination one, which is more urgent now.

2.1 BYD Auto makers' PHEV(Plug-in Hybrid electric vehicle) sale amount

The BYD PHEV sale amount will exhibit 1.2~2.1 ten thousand ones by Song plus~Song Pro in March, 2025 in light of Figure 1 where the sale numbers can indicate 1.3~1.6 ten thousand ones in January, 2025 accordingly. On the contrary, the Tang & Han retains the least sale numbers.

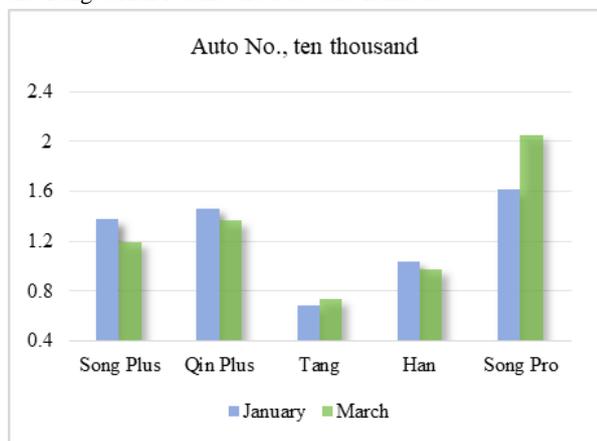

Figure 1 The BYD Auto maker's PHEV sale amount in 2025. [1]

Furthermore, the BYD PHEV sale amount will exhibit 1.3~1.5 ten thousand ones by Song plus~Song Pro in May, 2025 in light of Figure 2 where the sale numbers can indicate 5.8~8 ten thousand ones in total ie. accumulated ones from January~May, 2025 accordingly. On the contrary, the Han L & Tang L retains the least sale numbers. Meantime, the all of the Song Pro, Qin Plus, Song plus & Han exceeds 4 ten thousand in total calculation within January~May, 2025. So

that the total amount might attain 598,646 in January~May, 2025 as for the PHEV of BYD.

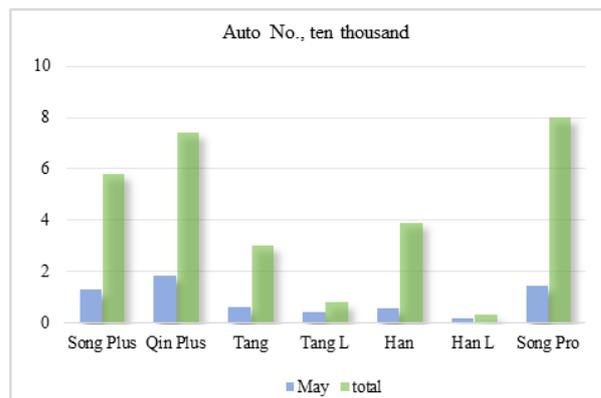

Figure 2 The BYD Auto maker's PHEV sale amount I in 2025. [1]

At the same time, the BYD auto maker's PHEV could display 3.2 ten thousand~8.3 ten thousand ones by Destroyer~Qing L in total in light of Figure 3 where the .0.2 ten thousand~1.9 ten thousand ones by them accordingly in May, 2025. Meanwhile, all of them surpasses 3 ten thousand in total computation.

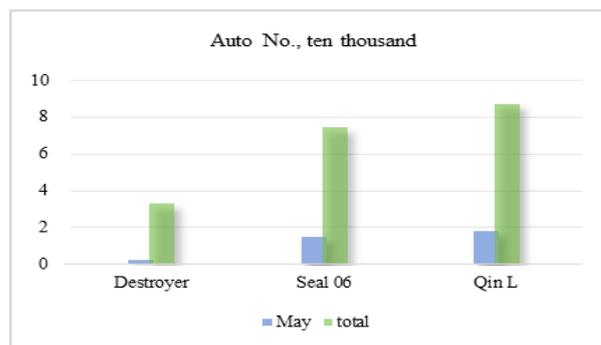

Figure 3 The BYD Auto maker's PHEV sale amount II in 2025. [1]

Furthermore, the BYD auto maker's PHEV sale amount might indicate 0.7~1.9 ten thousand in March, 2025 by Destroyer~Qin L in light of Figure 4 respectively where its sale amount can reach 0.9~1.6 ten thousand in January, 2025 accordingly by them as well. Meantime, the sale ones of the Qin L & the Seal 06 can all surpass 1.5 ten thousand ones in January & March, 2025.

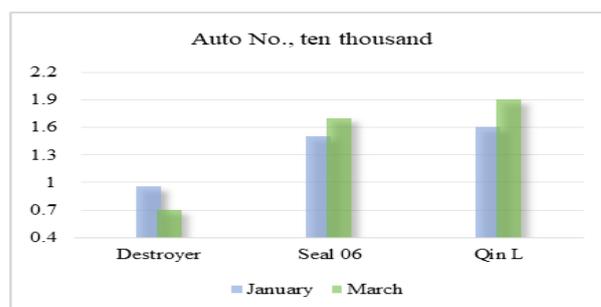

Figure 4 The BYD Auto maker's PHEV sale amount III in 2025.

2.2 Guangdong & Taiwan GDP comparison

Their GDP would attain 4.6~3.1 trillion yuan in 2010 in light of Figure 5 whose value exceeded 3 trillion yuan for Guangdong in 2007~2010 expressed the strong economy entity and potential while the Taiwan exceeded 2.5 trillion yuan all except in 2008.

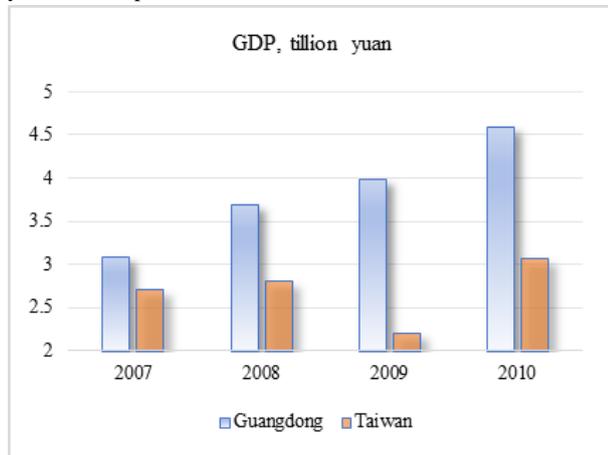

Figure 5 The Guangdong & Taiwan GDP rank in 2007~2010.

2.3 China provinces & Iran GDP comparison

The Chinese Shanghai & Iran GDP would exhibit 220~110 billion dollars by them in 2004 accordingly in light of Figure 6 where the time between them might arrive in 2 times which was the same times within 1999~2004 by Iran. Meantime, the variation between Iran and Shanghai occupied the former and latter ones could attain 110 billion dollars with high difference.

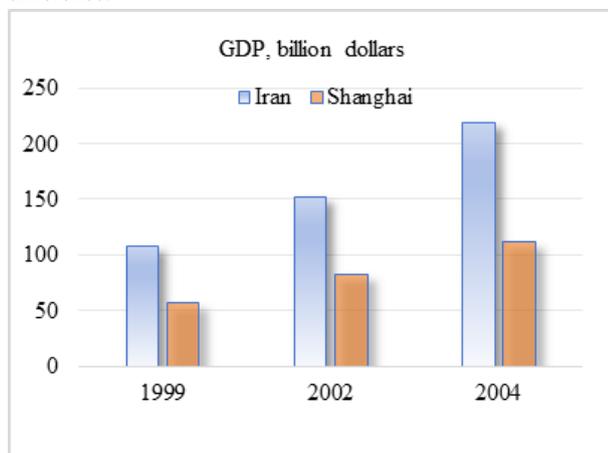

Figure 6 The Shanghai & Iran GDP rank in 1999~2004. [2]

2.4 New York Federal reserve bank analysis

The New York federal reserve bank analyzed the recent one result discovered the university deserving investment and exhibited choosing speciality has an important effectiveness. So that the date expressed STEM ie. science technology engineering mathematics field's students lied in high incoming potential cutting-edge. The professor in University of Tennessee agreed to that and emphasized that near twenty years the engineering and computer science has still extended its field. Though the working chance has many, the unqualified speciality talents has not lacked which make the

salary level to enhance continually. For example, the computer science, computer engineering & chemical engineering major's students have about eighty thousand dollars as per one year. Meantime, the other subjects like electricity engineering, industrious engineering & aerospace engineering whose salary has good competition existing in 75~78 thousand dollars. The aerospace engineer middle salary may indicate 125 thousand dollars as per year, however the computer engineer and electric engineer's middle ones can provide 122~120 thousand dollars. On the other side, the finance & economy also affords plenty of middle ones with average one to be 110 thousand dollars which reflects the market as to analyzing capability high-requirement. [3] Nevertheless, in education field specially in baby one field which belongs to one of the lowest salary speciality. Moreover, the average salary with those field's middle employees as per one year has become 49 thousand dollars which expresses the various subjects' big variation in incoming potential aspect.

2.5 Main traditional Auto Group sale amount analysis

The main traditional top six Auto groups sale status could display 1.7~1.0 million for BYD Auto and Chery group in the first Jan.~May respectively in light of Figure 7 whose speed might indicate 37%~13% accordingly. [11] Meantime, the Geely & BYD Auto may occupy the first two highest positions expressed their strong making capacity and capability. Following the mentioned above two the Chery group & Shanghai Auto can occupy the third & fourth position respectively there.

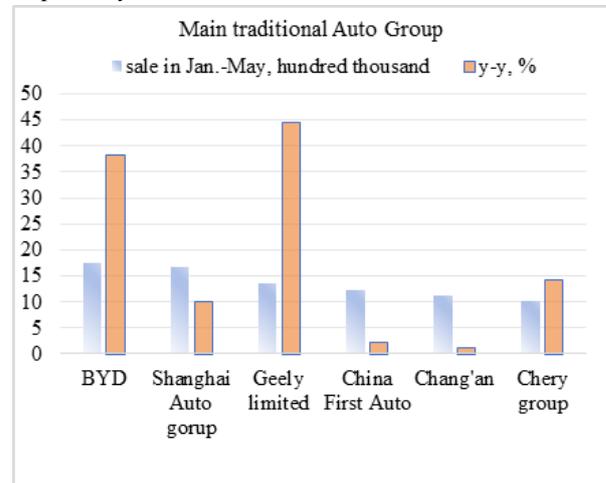

Figure 7 The main traditional Auto Group sale amount in 2025.

Moreover, the main traditional Auto group sale status following the top six could display 0.7~0.4 million for Dongfeng group and Great Wall Auto in the first Jan.~May respectively in light of Figure 8 whose speed might indicate 17%~1% accordingly. [11] Meantime, the Beijing group may occupy the first position expressed their strong making potential and capability. Following the mentioned above one the Great Wall Auto can occupy the second position with little minus for y-y value there.

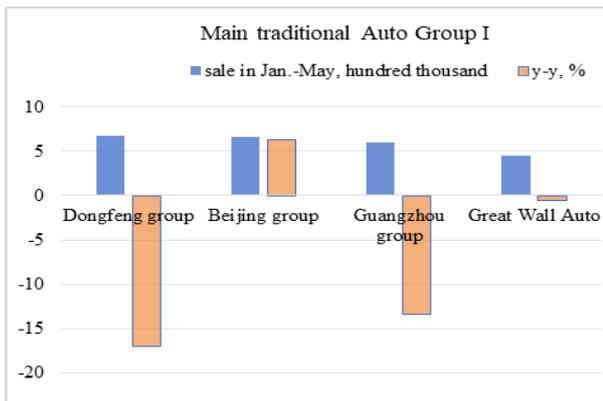

Figure 8 The main traditional Auto Group sale amount I in 2025.

3. Conclusions

Because the economy could depend on the high-technique research and development whose role may be important like AI(artificial intelligence) product on Yushu Technology corp. In China and Boston dynamic corp.. The former's humanoid robot will have swift and rapid feature while the latter may have men-like and accurate one. They are about to become future AI robotic start-profile to encourage us to progress further steps to consider the cost budget and materials, working stability etc. manufacture problem. So the economy influences the high-technique field skill and product research & development largely through joining to the research's many respects like human resource, materials and capital expending etc.. however, those support may be completed the manufacturer plan and determined by government institution, so they must guarantee the requested profit which can be burden mostly by manufacturer or the bilateral burden like advantage items for example the new energy project, ocean project, aerospace engineering, drug making, food product. So the primary, secondary industry and service sector(Tertiary industry) will be developed broadly to satisfy the human being demand more and more. Therefore, we may enjoy the cutting-edge-field product and service early and aim for exploring aerospace even astronautic story in the end. Meanwhile, through learning their knowledge published in journal we could proceed the relevant project research and development to apply to make samples to certify the error deviation for those data and their correct so as to extend our research scope and further direction as to a certain products.

Conflict of Interest

The authors declared that there were not conflicts of interest to disclose.
