Abstract

With regards to the high-tech skill and products the research on them will become necessary and important currently by Scientists who has pursued those high-tech searching for producing innovation product urgently. So that we may participate in the new machine even robot service expenses which may bring out many new idea and method for us to continuously push those innovation products forwards sustainably. Therefore, the new employment will be realized for those graduates from college annually and meanwhile, the high-tech product supply chains can carry out many new opportunities gradually and eventually. There will be a much more big space in the huge chains which is not neglected at all though they may process one special part there is still many those OEMs(original equipment manufacturers) for making a final product completion at the down-stream makers. As we knew the hundred parts will assemble one complete product, so the technique transfers to the up-stream OEM will be important which we are named the technology transfer for their survival to look for more working chances. On the other side, the scientist will still be publishing their achievement on a famous journal for us to identify and use which can shorten down our research time and times for the sake of being convenient to use on our research to create another product in time. No matter what there will be existing the barrier the step must be crossed by ourselves early and later, we must delete all of difficulty showing in front us to push a way to insist in the reforming time for the whole people and earth in spite of sacrificing ourselves to become a contributor. At last the scientist and scholar &fellows must write their cherish papers to publish the relevant research achievement in public to exhibit their latest research-work to reader. Thereby the all aspects may be exposed with a certain style to acquire the experts acceptance.

Keywords: *innovation research; high-tech product; method; sustainably; senior scientist*

1. Introduction

In current society the high-technique products will be dominated in others to become a strong force to push the society to develop continuously and sustainably, so the scientist and scholars will become an important factor to play in every place to proceed the relevant research and study on the hot point frequently. So that publishing achievement papers may provide a strong force to support the future life-level like climate change and public sanitation for benefiting the world human in future. We should go on searching for innovation papers include in the latest high-technique product research like clean energy and new one to push many lots of skill to make different cutting-edge-field product continually. As we knew the current climate problem will be derived from the contaminating factory and automobile, so the new energy should occupy the first significant position for our scholar &scientist and experts to sustainably search and make

measure to solve it from variation views which may help us to think about more factors to replace the problems mutually. We might align the measure from one view to different one to proceed simulate to judge the first and the second even third method to solve it for the sake of once happening the problem accident there will be another method to replace it in urgency. [1~6] So we put our eyes too long not only viewing the current status but also looking at the longer years like fairy tale cinema which provide future world several hundred years later. We may interest in those splendid scenery and consider the usefulness and make some experiments to trial the feasibility, like the flight automobile which pass by the high buildings and make a dormitory in the one. There will not earth surface auto and all the auto can become flight one which is a future plan by USA fairy cinema maker. There may be not contamination gas and all of atmosphere is electric power and hydrogen fuel even small nuclear reaction pile as an engine. So we must emphasize the current energy exploitation and found so as to predict to make a plan to prepare the future infrastructure and write more paper with innovation method to arouse the future contribution. With the GDP enhancement we should not avoid to enter the ideal world with many robots in AI(artificial intelligence) software and automobiles with intelligent driving time many decades years later, so we prepare to afford the controlling skill to fix robots logical life and automobile matters with those high energy fuel. As to the former the controlling will be proceeding from now on and its equipment needs to enter our live life many years later and the latter will experience safe driving course with no accident. Those problems will must think about by us in advance or the error ones and accident may occur by then. [7~9]

2. Discussions

With regards to developing economy and high-tech status year by year our society will be sustaining an innovation stage where many of us meet the new department and subject challenge so that we must prepare to grasp skill and product feature proficiently in advance for the sake of wielding them in future occupation life. We should carefully and boldly educate the talents and scientists through professor and tutor having a certain level and experiences continually. Meanwhile the young post-doctorate researcher should be educated so as to succeed the important task some time later like continue to complete the new subject. The qualified one may be appointed to be a associate professor and senior researcher to take a burden to educate the MS(Master of Science) &PhD(Philosophy of Doctor) degree continuously. Because they had some and much opportunities to complete the relevant projects singly and collaboratively which belongs to the high-tech product experimental and theoretical deduction. Thereby those ones includes in many innovative methods and calculations correspondingly. At the same time, the reports and papers will be submitted to the Fund commission which may be speared through the relevant scientists. [10~23]

2.1 EV(electric vehicle) Auto export countries and Hurun former hundred rich-men ranking

The EV Auto export top four countries and numbers showed 230,000~140,000 in January~September 2025 by Belgium~Brazil respectively to show Belgium as first export country in light of Figure 1. Meantime, their y-y indicated 80%~2% by Philippines~Brazil accordingly to show the highest export growth speed to Philippines.

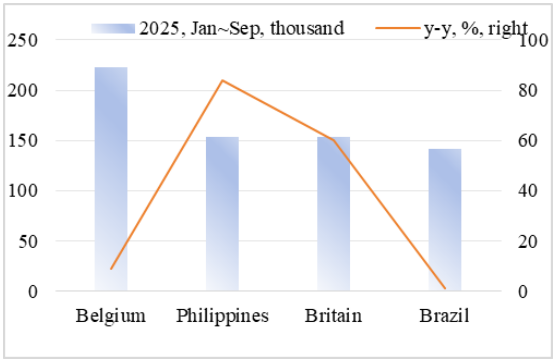

Figure 1. The EV Auto export top four countries and numbers. [1]

The Zeng Liuqun，Lei Jun, Li Shufu &Wang Chuangfu entered the first, second, third &fourth ones in 2025 Hurun former hundred rich-men ranking as new energy vehicle entrepreneurs in China. Meantime, they have owned 3,300, 3,260, 2,250 &1,800 billion yuan with y-y speed 65%, 151%, 55% &33% respectively in 2025 occupied the first~fourth one. At last, the Lin Bin recorded 151% y-y 2025 with the highest speed as Lei Jun there.

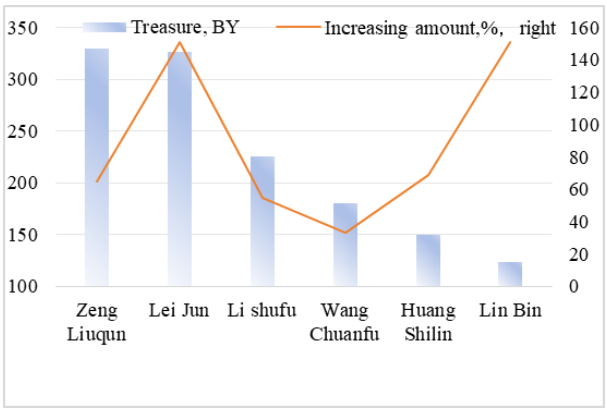

Figure 2. The Hurun former hundred rich-men ranking in 2025 [5]

2.2 Thousand strong town &villages

The thousand strong town &villages top 16 cities' distribution in China for 2024 shows 51~19 by Ningbo~Foshan city respectively in Table 2 to show the Ningbo stronger one than others. Furthermore, the second~fifth one occupies by Suzhou, Nantong, Jiaxing &Quanzhou city with 50 41, 38 &30 accordingly in 2024. On the other side, Hangzhou, Xuzhou &Zhengzhou becomes 21, 19 &19 only accordingly in this top 16 cities analysis. Up to 2023 the nation-wide has 21,400 towns and 7,080 villages for your reference. The evaluative criteria includes economic develop, innovative activity, developing potential, ecological resident, life richness five first indicators and 25 second indicators as evaluative one. [2]

Table 1 The thousand strong town &villages top 16 cities' distribution in China [2]

Ranking	City	Number	Ranking	City	Number
1	Ningbo	51	9	Wuxi	27
2	Suzhou	50	10	Guangzhou	24
3	Nantong	41	11	Taizhou	24
4	Jiaxing	38	12	Yangzhou	23
5	Quanzhou	30	13	Hangzhou	22
6	Changzhou	29	14	Xuzhou	21
7	Dongguan	28	15	Zhengzhou	19
8	Huzhou	27	16	Foshan	19

Meantime, the thousand strong town &villages top 17~28 cities' distribution shows 19~11 by Jinhua~Zibo city respectively in Table 3 to show the Jinhua stronger one than others. Furthermore, the eighteenth~twentieth one occupies by Shaoxing, Yancheng &Fuzhou city with 19, 16 &14 accordingly in 2024. On the other side, Wuhu &Zibo becomes both 11 only accordingly in this cities analysis. At the same time, Taizhou &Zhuhai city occupied the both 10 ranking the 29, 20.

Table 2 The thousand strong town &villages top 17~28 cities' distribution in China [2]

Ranking	City	Number	Ranking	City	Number
17	Jinhua	19	23	Zhongshan	13
18	Shaoxing	19	24	Tangshan	13
19	Yancheng	16	25	Zhenjiang	13
20	Fuzhou	14	26	JIning	12
21	Wenzhou	14	27	Wuhu	11
22	Zaozhuang	14	28	Zibo	11

2.2 Gold producing amount in main countries

The Gold producing amount in four countries showed 420~230 tons by China~USA in 2024 respectively in light of Figure 2 to show the China advantage in reserved gold aspects. Meanwhile the Russia and China y-y rate indicated 3% &-5% accordingly to show the Russia flown more rapidly than China.

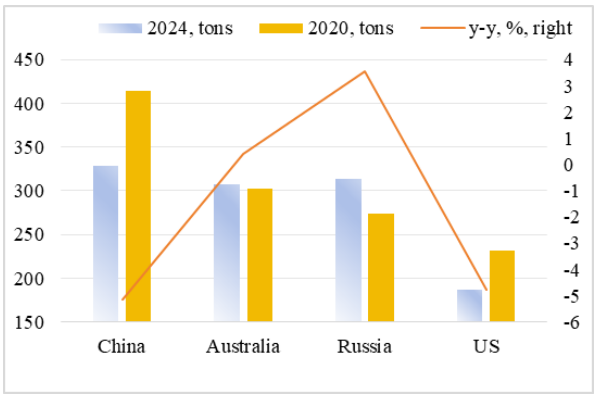

Figure 2. The Gold producing amount in four countries. [3]

2.3 Computer power ranking

The eleventh, twelfth, thirteenth city will become Chengdu, Wuhan，Zhangjiakou accordingly to show their strong digital development situation in IT(information technology) field in light of Table 3 where the Dongguan and Qingdao occupied the last two ones.

Table 3 The computer power ranking, in China cities [4]

Ranking	City	Ranking	City
11	Chengdu	16	Jinan
12	Wuhan	17	Fuzhou
13	Zhangjiakou	18	Wuxi
14	zhengzhou	19	Dongguan
15	Huhhot	20	Qingdao

In short, we may look for the more market like aboard and in domestic and find more valuable project to search and propose to maker hand so as to complete the new technique product, also as for the difficulty the college and institution will study further and deeply and then transfer those procedure's parameters essential like the material composition &equipment, dealing temperature and time, size and demanded strength etc. to maker R &D(research &development) department to check whether it is about to be available or not in the views of sample making and know the market demand easily and promptly. So we can do those ones according to the satisfying criterion then we may produce the innovation product in time even advance, there is still much profit in front of new product that may increase the salary, welfare etc a series of bonus to us for the sake of raising the whole GDP value at all. If the economy condition is still in peace the our plan will be realized in advance, but there is to happen accident like virus pandemic and region war the plan would be revised and delayed some time. In the end the achievement through wielding our endeavor whenever it is normal status the aim will have to succeed we trust.

3. Conclusions

With regards to the high-tech skill and products the research on them will become necessary and important currently by Scientists who has pursued those high-tech searching for producing innovation product urgently. So that we may participate in the new machine even robot service expenses which may bring out many new idea and method for us to continuously push those innovation products forwards sustainably. Therefore, the new employment will be realized for those graduates from college annually and meanwhile, the high-tech product supply chains can carry out many new opportunities gradually and eventually. There will be a much more big space in the huge chains which is not neglected at all though they may process one special part there is still many those OEMs(original equipment manufacturers) for making a final product completion at the down-stream makers. As we knew the hundred parts will assemble one complete product, so the technique transfers to the up-stream OEM will be important which we are named the technology transfer for their survival to look for more working chances. On the other side, the scientist will still be publishing their achievement on a famous journal for us to identify and use which can shorten down our research time and times for the sake of being convenient to use on our research to create another product timely and early. No matter what there will be existing the barrier the step must be crossed by ourselves early and later, we must delete all of difficulty showing in front us to push a way to insist in the reforming time for the whole people and earth in spite of sacrificing ourselves to become a contributor. At last the scientist and scholar &fellows must write their cherish papers to publish the relevant research achievement in public to exhibit their latest research-work to reader. Thereby the all aspects may be exposed with a certain style to acquire the experts acceptance.

Foundation

This paper was supported by the Korean Science & Engineering Fund under the granted No. 96-0300-11-01-03, with the Specified Basis Research program.

Conflict of Interest

The authors declared that there were not conflicts of interest to disclose.
